SAN FRANCISCO, CAL. Dec. 19, 1921.

Mr. Leopold Justi,
Glen Ellen, Calif.

Dear Mr. Justi:

The dry leaders are putting over a very effective campaign of misrepresentation which is enabling them to get cities and counties to adopt little Volstead ordinances in the hope that they will be able to assure the passage of the Wright State Prohibition Enforcement Law, which they say is directed against BOOTLEGGERS but in reality is intended to put the State on a bone-dry basis FOREVER.

I am preparing a warning which I am anxious to circulate among unsuspecting officials in every city not yet intimidated. It will appear in the January issue of the CALIFORNIA GRAPE GROWER and I am writing to know if you will not help me get it into their hands promptly to prevent any more municipalities or counties falling for their dry propoganda.

Now is the time to stop them not after the different counties, where they are now working, are tied down to a one-half of one percent alcoholic content that cannot be changed should Congress modify the Volstead Law.

I am also conducting an active campaign against the WRIGHT STATE PROHIBITION ENFORCEMENT ACT, but my work is necessarily limited because I cannot afford to pay postage and send out extra copies of the GROWER to the many people throughout the State who are our friends but are not posted and, therefore, are not concerned.

I need your help. A contribution of $5.00 will aid me materially to reach the city and county officials with the GROWER. Please let me hear from you promptly so that I will know how many extra copies of the January issue I will be warranted in ordering from my printer.

Wishing you the Compliments of the Season, I am,

Sincerely yours,

H. F. Stoll

Editor.
